

LEGACY PRODUCTS **DISCONTINUED

TEMP°ALERT®

DTA-1

Need to know:

This product and its probes/accessories have been discontinued.

- Built in temperature ambient temperature sensor
- Allows one external probe

Replacement Product Options:

Product	Model Number	Input Voltage	Zones
EnviroAlert EA200-12	EA200-12	12 VDC	2*
EnviroAlert EA200-24	EA200-24	24 VDC	2*
EnviroAlert EA400-12	EA400-12	12 VDC	4
EnviroAlert EA400-24	EA400-24	24 VDC	4
EnviroAlert EA800	EA800	11-26 VDC	8

How do I choose the correct replacement product?

Replacement product correlates to the application.

- Monitoring coolers/freezers, replace with EnviroAlert product according to zone count.
- Monitoring hard to reach areas, replace with EnviroAlert EA800 using wireless sensors.

What do the new EnviroAlert products offer?

Use EnviroAlert EA200 built in ambient temperature sensor and an external probe simultaneously. EnviroAlert EA200 accommodates one probe to monitor for temperature, humidity, or water presence. EnviroAlert EA400 allows any combination of up to 4 sensors (temperature, humidity, water presence). The EnviroAlert EA800 has wireless capabilities and accepts non-proprietary 4-20mA sensors. EnviroAlert products have zone specific relays and an auxiliary relay if any zone goes into alarm. Alarm delay (0-120 minutes) to avoid nuisance alarms.

*The EA200 has one built in temperature sensor and allows up to one external probe. The EA400 and EA800 do not have any built in sensors thus requiring all external probes.
