

# POWER-OUT ALERT™

For prompt notification of a power outage

PS-110

If you rely on electricity for the operation of essential equipment in your business or home, a power failure can mean much more than an inconvenience. Gone undetected a power outage may cause extensive damage, loss of property and time. The POWER-OUT ALERT by Winland is a compact, easy-to-use monitor that simply plugs into any outlet on the (110 volt AC) circuit needed to be monitored. POWER-OUT ALERT has an attached 15 foot cord that wires into an existing alarm system, telephone dialer or other emergency equipment. When power to the monitored circuit is interrupted for more than 3 to 8 consecutive minutes, POWER-OUT ALERT activates the emergency equipment it's hooked up to, providing prompt notification of a power outage.

Using several POWER-OUT ALERTS makes power outage monitoring for an entire complex easy!

## ***IDEAL FOR:***

- Industrial Plants
- Computer Rooms
- Residential Homes
- Freezers and Refrigerated Rooms
- Buildings with controlled climates
