### **About Winland Electronics**

Winland Electronics, Inc. ([www.winland.com](http://www.winland.com)) markets and sells its line of proprietary, critical-condition monitoring products primarily through an established network of distributors, dealers, security installers, and integrators. In most cases, these products are manufactured to protect against loss of assets due to damage from water, excess humidity, extremes of temperature, and loss of power. The Company offers an automated, cloud-based critical-environment monitoring solution that provides early alerting, reporting and logging, and ensures regulatory compliance. The Company is also exploring various alternatives to enhance shareholder value that utilize the expertise of management and the Board of Directors. Such alternatives may include establishing new ventures, acquiring existing businesses, and other investment opportunities, including investments in marketable securities.
